BOONYOUIN HEIFERS FOR SALE - September 2023

NOTES

This is a lovely line of heifers and in a normal year they would've been retained, but this is not a normal year. The group has been through a tough dry winter and now a dry spring but they are not yet showing too many ill-effects from the drought. The majority have been running in a 2-3 acre paddock, on oaten hay for the last 3 months. We've been dry since April, and I lost an agistment paddock late last year, so am overstocked, with little option other than to sell.

They are all well-handled and worked either on foot or bike. In general, their types and temperaments are above average to excellent. I rate all my herd out of 10 for type and temperament (amongst other things) and each animal's individual scores can be seen in the box below their individual EBVs.
Also please find their current weights and lifetime kg/day from that weight.
Breedplan data and graphs were extracted 18.9.23. The heifers are listed in age order.

DNA parent verification is pending, sent 11/9, results due early October. The group has had 7 in 1 boosters and multi-min as well.

All sensible offers will be considered, with discounts for bulk purchases available, and a freight rebate for interstate purchasers.

Priced from $2,000 +gst
